Rules on letting this property
Properties can be let if they have an energy rating from A to E.

You can read guidance for landlords on the regulations and exemptions.

Energy rating and score

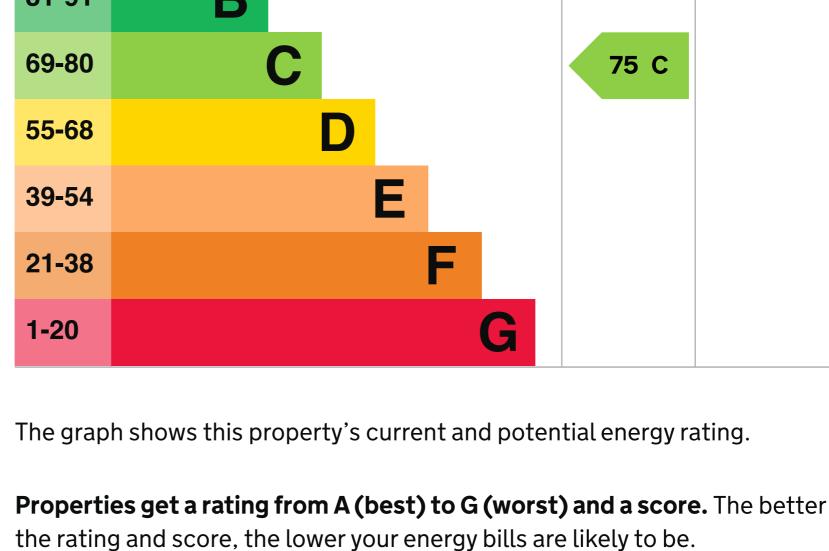

See how to improve this property's energy efficiency.

92+

Energy rating Score Current

This property's energy rating is C. It has the potential to be A.

81-91

• the average energy rating is D

• the average energy score is 60

Features in this property Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their

features the assessor could not inspect.

condition.

For properties in England and Wales:

Feature Description Rating Cavity wall, as built, insulated (assumed) Good Wall

Assumed ratings are based on the property's age and type. They are used for

Fully double glazed Good Boiler and underfloor heating, oil Main heating **Average**

Programmer and at least two room Main heating Good thermostats control From main system, plus solar Hot water Good Lighting Low energy lighting in all fixed outlets Very good Floor Solid, insulated (assumed) N/A Secondary heating Room heaters, wood logs N/A Low and zero carbon energy sources Low and zero carbon energy sources release very little or no CO2. Breakdown of property's energy performance

Roof Pitched, insulated (assumed) Good Window

these sources may help reduce energy bills as well as cutting carbon

An average household would need to spend £873 per year on heating, hot water and lighting in this property. These costs usually make up the majority of your energy bills. You could **save £0 per year** if you complete the suggested steps for

How this affects your energy bills

Estimated energy needed in this property is:

Impact on the environment

• 6,189 kWh per year for heating

• 2,267 kWh per year for hot water

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO2) they produce each year.

production You could improve this property's CO2 emissions by making the suggested

changes. This will help to protect the environment.

Do I need to follow these steps in order?
