NOTES:

This survey is commensurate with RICS detail accuracy Band D. Levels are related to a local, arbitrary site datum, located on the finished floor level inside shop entrance, as indicated on the Ground Floor Plan drawing.

This drawing is to be read in conjunction with all related Architects, Consultants and Sub-Contractors drawings and specifications.

The Contractor is advised that all design drawings and information are to be read concurrently and any discrepancies or omissions reported directly to Geo Scan.

Due to the inherent instability of paper materials, drawings plotted on paper may be stretched and distorted – dimensions scaled from paper plots should therefore be treated with caution.

ISSUE/REV:	DESCRIPTION:	BY:	DATE:
01	First Issued	SL	13/02/23

3D = Isometrics/3D
 C = Reflected Ceiling Plan
 E = Elevation
 P = Floor Plan
 S = Section
 T = Site Plan/
 V = Visualisation Topographic Plan
